INDUSTRY

OFFICE BUILDING AND FACILITIES FOR GAS PIPELINE CONSTRUCTION CONTRACTOR

The modular office facilities were built on a green field. The building is air conditioned and connected to a well that provides water supply. The waste is discharged into underground pits. The building is powered by generators. We supplied furniture, including kitchen appliances.

OFFICE BUILDING AND FACILITIES FOR A CONSTRUCTION COMPANY

Facilities for a construction company, including offices, meeting places and sanitary facilities on Senovážné náměstí. The offices are equipped with complete computer network and standard office furniture. The kitchen is tailor-made, including electrical appliances. The building is protected by a security system.

OTRUBY SAND QUARRY

The specially modified ALGECO module serves as facilities for the sand quarry operating. The base of the module allows good visual contact with suppliers and easy adjustment of the industrial scale.

360° SERVICE

DEK PRAGUE

34 modules with a usable area of 450 m² are available to builders implementing a developer project. The modules are accessible from the outside via stairs with powerful LED lighting. We equipped the rooms with furniture, waste bins and fire extinguishers.

ADVANCE PLUS

360° SERVICE

With a projector screen, flag columns, entry stoop with rooflet, cleaning zone. A central switchboard is included in the delivery.

TAKENAKA EUROPE

He modular concept creates a platform for dealing with contractors. To get the demanded impressive room, the customer chose the ADVANCE PLUS product. The air-conditioned sets integrate a separate kitchen as well as a sanitary container.

BENTELLER

The two-storey modular assembly served in 2018 as a facility for a manufacturer in the automotive industry. The modules were used as offices, locker rooms and a dining room. As always, we also provided the 360° SERVICE, including air conditioning for indoor comfort.

HOCHTIEF - NEGRELLIHO VIADUKT

The building serves as administrative facilities for the reconstruction of the Negrelli Viaduct in Prague. The set is made up of a system of corridors and includes sanitary facilities and kitchens. The offices are fully air conditioned. The entrance to the upper floors is via stair towers.

OLYMPUS PŘEROV

During the reconstruction, ALGECO ensured alternative office facilities. The complete services included an air-conditioned two-storeyed structure, with carpet flooring and IT distribution networking, gully tanks and a storage module for construction use.

MONDI ŠTĚTÍ

PREMIUM limited liabilities - maintenance services, cleaning 3x a week, split AC, DATA-NET services. The company decided to completely refurbish all their premises, and ALGECO products became an important part of the project. Thanks to our modular solutions, dozens of managers and assembly-men found the background.

VARROC LIGHTING SYSTEMS

Split Acs, distribution networks, glass entry doors, central distribution box, container grounding, hydrant, extinguishers, staircases, rubber flooring for opacity and comfort of stairs, door rooflets. The ALGECO modules were used for staff offices and sanitary facilities. In addition to the modules, we also supplied a kitchen.

360° SERVICE
A customized glass partition.

MAIER CZ

Odular concept of the manufacturing object of the Maier facility in Prostějov. A freestanding two-storeyed building with a slanting secondary roof and flying parapet. The building accommodates administrative services, offices, a conference room and sanitary facilities.

SERVICE

Complete furniture, multifunctional units, AC system, projector, meeting room and cleaning zone.

DÜRR SYSTEM AG

Administrative building for a German company while the JAGUAR LAND ROVER premises were in construction. The completely furnished houses are available to any internal or external customer.

SERVICE

Split ACs, heavy duty carpet flooring.

ESCO CZ

He ALGECO modular units became the temporary facilities of wholesale staff. The customer thereby solved the need of a temporary attachment for offices during the reconstruction, and found the ALGECO modular structures to be optimal.

JAGUAR LAND ROVER

One of our largest modular structures was erected in 2016 in Nitra. This will serve as a facilities for the JAGUAR LAND ROVER factory construction. Thanks to the flexibility and our complete services, the air-conditioned ALGE-CO structures were fully adapted to the requirements of the client.

HOCHTIEF CZ

The ALGECO modular units were used for air-conditioned offices with full sanitary attachments in Praha - Dejvice; the layout is based on a large open-space cafeteria, conference rooms, offices and other facilities.

ANTOLIN LIBAN

ALGECO offers imaginative solutions to the customer's conditions, even when limited. Just the small area was enough for the facilities needed for staff, made of the warmed moduls. The complete services also included more than 100 wardrobes, a central distribution box and other equipment.

MND DRILLING A SERVICES A.S.

Two-storeyed construction was grounded on the concrete panels laying on the arable land. The moduls were completely equipped with the furniture required and the hoarding was delivered to the object.

This ALGECO modular structure makes the facilities for workers at gas wells during construction.

EVENTS

IIHF ICE HOCKEY WORLD CHAMPIONSHIP SLOVAKIA 2019

ALGECO The ALGECO modular buildings became a base for TV crews broadcasting the events from the Ice Hockey World Championship as well as security zones. During the entire championship, all spectators and visitors went through special modules with frame detectors.

REDBULL BURGERFEST

A residential container as a base for the presentation of Red Bull Mind Gamers, a computer game. We used the ALGECO SHOP series for the two-day food cultural festival at the Prague Exhibition Grounds. Our modules are very often used as facilities for various events.

KIA SPARE SHOWROOM

Our modules formed two workstations with office equipment, as a temporary base for the KIA showroom. Thanks to the glass walls of the ALGECO SHOP modules, the dealers had enough light and, above all, an overview of the cars on display.

NATO DAYS

Kitchenettes, water containers, pumps, information desks, bar chairs, tables, stands, carpets, refrigerators, french windows, shelves. At NATO days the ALGECO modules were used for organization staff and VIP spaces, and naturally, for background use as the kitchen and sanitary space too.

COLOURS OF OSTRAVA

AC, billboards, glass doors, mobile terrace, staircases. This time ALGECO modules formed the organizational and VIP structures at the main stage and facilities for the performers and staff. Sanitary modules were used for WC and showers of the facilities.

The attractiveness of the International film festival in Karlovy Vary is available by the contribution of ALGECO making the facilities including complete service. The staircase towers for the lovely view are very popular. More than 30 modules are used during the festival for visitors and organisers.

KVIFF KARLOVY VARY

SIAF

In August 2017 Sliač was the venue of the 7th. International Air Show. The ALGECO modules serving as a background for visitors were used in the VIP zone. Eight modules were divided into four skyboxes.

BEACH MAGIO

An annual basis, ALGECO provides services for the management of Bratislava summer event of „Magio beach“. The housing and sanitary modules provide a problem-free traditional Bratislava summer event. The gully tanks are provided too.

SCHOOL

BYSTŘICE

Our modular structures were used as a temporary kindergarten in Bystřice. This is a clear proof that our modules can also form creative solutions for the needs of our customers. We managed to meet the individual requirements of the investor, and the result was a beautiful kindergarten for children.

VELKÁ CHUCHLE

Project of a two-storeyed building representing housing and sanitary modules. The structure can hold 96 children in Praha 5, Velka Chuchle, where temporary premise was needed while the old building was rebuilt.

SCHOOLS

ALGECO provides buildings for schools and kindergartens with a fast time of erection, solving capacity problems. The complete services assist in the equipment of school desks, changing rooms, toilets and facilities for children.
